

## **Dog Owner Relationship Coaching**

*"I believe pet dog owner relationship should be a happy & successful one for owner and dog" MR June 2014*

Dogs and owners need to be comfortable about how they live together, play together and walk/exercise together!

Pet Dogs and owners are unique & come in all shapes and sizes - so there is not one rule that suits all the dogs or all the owners!

There is no quick fix or magic trick training, magic equipment or magic methods either!

Dog Obedience Training is a must for puppies and advisable creating common basic commands to use with all pet dogs. What dog obedience training doesn't offer is what personalised behavioural coaching can do for the combined successful relationship.

Pet dogs are a family member- No longer considered a back yard dog

Dogs and their owners should enjoy their lives together every day - simple!

To do that they need to understand each other's behaviour, enjoy each other's company and work towards the route of their chosen way of life, no wrong or right.

Behaviour breeds Behaviour

This is **not** dog obedience training;

This is relationship behavioural **coaching** between canines & their humans!
